

S&G GLOBAL CONSTRUCTION

BUILDING THE FUTURE

Company Overview | Construction • Infrastructure • Pipeline Works • Heavy Equipment

International construction and engineering solutions

S&G Global Construction presents its capabilities in civil construction, pipeline-related works, site preparation, and heavy equipment sourcing and supply. Project scope, equipment availability, and service arrangements are confirmed through individual enquiries.

Our Focus Areas

Civil Engineering & Infrastructure

Road, bridge and site-related construction enquiries, including earthworks and supporting civil activities.

Pipeline & Industrial Works

Pipeline corridor works, trenching, installation support, site coordination and related industrial construction needs.

Heavy Equipment Solutions

Equipment sourcing enquiries for excavators, bulldozers, wheel loaders, cranes, compactors and pipeline equipment.

International Project Portfolio

Photographic galleries organized by South Africa, India, Ukraine, Iraq, Singapore, Mali, Rwanda, Syria and other Asian locations.

Partnerships

Opportunities for subcontracting, machinery procurement, engineering cooperation and construction project partnerships.
